ABSTRACT

This bibliography lists materials available from the National Agricultural Library's (NAL) AGRICOLA database that are related to crime and crime prevention in rural areas. The bibliography was derived from a search of books, journals, research reports, and Cooperative Extension Service publications that have been entered into the database since January 1979. The 91 citations include the NAL call number, title, author, place of publication, publisher, journal information, language, and descriptors. In some cases, an abstract is included. Materials cover topics such as criminality, delinquent behavior, family violence, adolescent development, juvenile delinquency, law enforcement, criminal justice, property protection, victimization, rural communities, rural youth, and youth programs. Also provides information on the Rural Information Center, a joint project of NAL and the Extension Service; document delivery services to individuals; and electronic mail access for interlibrary loan requests. Includes author and subject indexes. (LP)

Bibliographies in the Quick Bibliography Series of the National Agricultural Library, are intended primarily for current awareness, and as the title of the series implies, are not indepth exhaustive bibliographies on any given subject. However, the citations are a substantial resource for recent investigations on a given topic. They also serve the purpose of bringing the literature of agriculture to the interested user who, in many cases, could not access it by any other means. The bibliographies are derived from computerized on-line searches of the AGRICOLA data base. Timeliness of topic and evidence of extensive interest are the selection criteria.

The author/searcher determines the purpose, length, and search strategy of the Quick Bibliography. Information regarding these is available upon request from the author/searcher.

Copies of this bibliography may be made or used for distribution without prior approval. The inclusion or omission of a particular publication or citation may not be construed as endorsement or disapproval.

To request a copy of a bibliography in this series, send the title, series number and self-addressed gummed label to:

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

The **Rural Information Center** (RIC) is a joint project of the Extension Service and the National Agricultural Library (NAL). RIC provides information and referral services to local government officials, community organizations, health professionals and organizations, cooperatives, libraries, businesses, and rural citizens working to maintain the vitality of America's rural areas. The Center combines the technical, subject-matter expertise of Extension's nationwide educational network with the information specialists and resources of the world's foremost agricultural library.

The Office of Rural Health Policy in the Department of Health and Human Services (DHHS) and the NAL jointly created a Rural Information Center Health Service (RICHS) as part of the RIC. RICHS collects and disseminates information on rural health issues, research findings related to rural health, and innovative approaches to the delivery of rural health care services.

SERVICES:

Provide customized information products to specific inquiries including assistance in economic revitalization issues; local government planning projects; rural health issues; funding sources; and other related issues for the purpose of monitoring the quality of rural life.

Process a broad array of general and funding information requests on such topics as:

- Successful strategies, models, and case studies of community development projects
- Small business attraction, retention, and expansion
- Tourism promotion and development
- Recycling programs
- Community water quality
- Technology transfer to rural areas
- Closures, restructuring and diversification of rural hospital and clinics
- Agricultural health and safety
- Health programs, services, personnel issues
- State initiatives concerning rural health delivery issues

Refer users to organizations or experts in the field who can provide additional information.

Perform brief database searches of requested topics on a complimentary basis.

Furnish bibliographies and Rural Information Center Publication Series titles.

Identify current USDA and DHHS research and Cooperative Extension Systems programs.

Document Delivery Services to Individuals

The National Agricultural Library (NAL) supplies agricultural materials not found elsewhere to other libraries.

Filling requests for materials readily available from other sources diverts NAL's resources and diminishes its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL is viewed as a library of last resort. Submit requests first to local or state library sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. In other countries submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, submit requests to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's Document Delivery Service Information for the Library

The following information is provided to assist your librarian in obtaining the required materials.

Loan Service — Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans are made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

Document Delivery Service — Photocopies of articles are available for a fee. Make requests through local public, academic, or special libraries. The library will submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture*, or the NAL Catalog) and the call number is given, put that call number in the proper block on the request form. Willingness to pay charges must be indicated on the form. Include compliance with copyright law or a statement that the article is for "research purposes only" on the interlibrary loan form or letter. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – $5.00 for the first 10 pages or fraction copied from a single article or publication. $3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – $10.00 per reel.
- Duplication of NAL-owned microfiche – $ 5.00 for the first fiche and $ .50 for each additional fiche per title.

Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Establishing a deposit account with NTIS is encouraged. *DO NOT SEND PREPAYMENT.*

Send Requests to:

USDA, National Agricultural Library
Document Delivery Services Branch,PhotoLab
10301 Baltimore Blvd., NAL Bldg.
Beltsville, Maryland 20705-2351

Contact the Head, Document Delivery Services Branch in writing or by calling (301) 504-5755 with questions or comments about this policy.

ELECTRONIC MAIL ACCESS FOR INTERLIBRARY LOAN (ILL) REQUESTS

The National Agricultural Library (NAL), Document Delivery Services Branch accepts ILL requests from libraries via several electronic services. All requests must comply with established routing and referral policies and procedures. The transmitting library will pay all fees incurred during the creation of requests and communication with NAL. A sample format for ILL requests is printed below along with a list of the required data/format elements.

TELEFACSIMILE - Telephone number is 301-504-5675. NAL accepts ILL requests via telefacsimile. Requests should be created on standard ILL forms and then faxed to NAL. NAL does not fill requests via Fax at this time.

REQUIRED DATA ELEMENTS/FORMAT

1. Borrower's address must be in block format with at least two blank lines above and below so form may be used in window envelopes.
2. Provide complete citation including verification, etc.
3. Provide authorizing official's name (request will be rejected if not included).
4. Include statement of copyright compliance if applicable.
5. Indicate willingness to pay applicable charges.
6. Include NAL call number if available.

Contact the Document Delivery Services Branch at (301) 504-6503 if additional information is required.

Crime and the countryside.
McGranahan, D.A.
Washington, D.C. : The Service.
Rural development perspectives - U.S. Department of Agriculture, Economic Research Service v. 2 (2): p. 2-8; 1986 Feb.

Language: English

Descriptors: Crime; Rural areas; Property; Family structure; Poverty; Property protection

Abstract: Extract: Rural crime rates, though less than urban rates, now exceed the urban level of 20 years ago. Because the crime increase came at about the same time as renewed rural population growth, some blamed the growth itself. But incomplete or broken families (measured by the percentage of children not living with both parents) is a key link to rural crime, not poverty, race, or population growth.

13 NAL Call No: HD1411.O3
Crime, fear of crime and crime prevention: an analysis among the rural elderly.
Donnermeyer, J.F.; Phillips, G.H.; Kreps, G.M.; Steiner, M.J.
Columbus : The Department.
ESO - Ohio State University, Dept. of Agricultural Economics and Rural Sociology (1102): 15 p.; 1983.

Language: English

Descriptors: Ohio; Crime; Prevention; Elderly; Rural areas; Income; Housing; Safety; Communities

Abstract: Extract: Two statewide rural victim studies conducted in Ohio during 1974 and 1980 comprise the primary data bases in examining the relationship between crime and older rural Americans. The basic objectives of the report are two-fold. The first is to measure the extent and impact of crime, especially its psychologic effects. The second major purpose is to examine empirically the level of crime prevention practiced by older rural persons in order to develop and recommend appropriate security programs and strategies for reducing crime risk and fear of crime. Throughout the analysis, the elderly will be compared with younger respondents from the two victim surveys. This will allow for a relative assessment of the problem, and put within a more complete context the specific prevention program needs of older rural Americans.

14 NAL Call No: HV6250.4.A34C75 1983
Crime, fear of crime and crime prevention an analysis among the rural elderly : executive summary.

15 NAL Call No: 281.28 R88
Crime in nonmetropolitan America: A national accounting of trends, incidence rates, and idiosyncratic vulnerabilities.
Bachman, R.
Bozeman, Mont. : Rural Sociological Society.
Rural sociology v. 57 (4): p. 546-560; 1992. Includes references.

Language: English

Descriptors: U.S.A.; Crime; Rural areas; National accounting; Trends; Demography

Abstract: The prevalence and nature of crime in rural America have been given relatively little research attention. An overview of the trends, incidence rates, and particular vulnerabilities nonmetropolitan (nonmetro) residents have to criminal victimization compared with their metropolitan (metro) counterparts are provided through data from the National Crime Victimization Survey. Results indicate that victimization rates for all locations generally have been declining since the peak rates witnessed in the mid-1970s, with residents of metro central cities being the most susceptible to victimization, followed by other metro and nonmetro residents, respectively. Certain subgroups of nonmetro residents, however, are as susceptible as their counterparts in metro areas who reside outside central cities to particular types of victimization. Implications for policy are discussed.

25 NAL Call No: RA790.A1J68
The etiology of suicide and homicide in urban and rural America.
Lester, D.
Fresno, Calif. : California School of Professional Psychology.
Journal of rural community psychology v. 12 (1): p. 15-27; 1991. Includes references.

Language: English

Descriptors: U.S.A.; Suicide; Crime; Mortality; Etiology; Urban areas; Rural areas; Social behavior; Social integration; Correlation; Social disintegration

Abstract: A study of urban and rural suicide rates in the states of America in 1980 revealed that an index of social disintegration was strongly associated with both urban and rural suicide rates, as predicted by Durkheim's theory of suicide. However, rural suicide rates were also higher in states that were relatively more urbanized, supporting a social deviancy theory. Homicide rates in urban and rural states were associated with an index of Southernness, but rural homicide rates also were associated with the index of social disintegration.

26 NAL Call No: RJ499.A1J57
Family economic stress, maternal and paternal support and adolescent distress.
Lempers, J.D.; Clark-Lempers, D.
London : Academic Press.
Journal of adolescence v. 13 (3): p. 217-229; 1990 Sep. Includes references.

Language: English

Descriptors: U.S.A.; Adolescents; Rural youth; Mental stress; Depression; Delinquent behavior; Substance abuse; Agricultural crises; Economic depression; Parent child relationships; Support systems; Sex differences

Abstract: The present investigated the effects of family economic stress on parental support and adolescent maladjustment in 622 9th through 12th graders in a Midwestern farm community. Economic stress had a direct effect on adolescent depressive symptoms, delinquency and drug use. The findings also indicated effect: increased stress was associated with lower paternal support for female, but not male adolescents, and lower paternal support for females was associated with higher distress.

27 NAL Call No: HQ1.J86
Family violence and adolescents' perceptions of outcomes of family conflict.
Martin, M.J.; Schumm, W.R.; Bugaighis, M.A.; Jurich, A.P.; Bollman, S.R.
St. Paul, Minn. : National Council on Family Relations.
Journal of marriage and the family v. 49 (1): p. 165-171; 1987 Feb. Includes references.

Language: English

Descriptors: Kansas; Family crises; Adolescents; Attitudes; Familial incidence; Urban areas; Rural communities

28 NAL Call No: 281.28 R88
Fear of crime and residential location.
Belyea, M.J.; Zingraff, M.T.
Bozeman, Mont. : Rural Sociological Society.
Rural sociology v. 53 (4): p. 473-486; 1988. Includes references.

Language: English

Descriptors: North Carolina; Residential areas; Rural areas; Location theory; Crime; Rural sociology; Sex differences; Ethnicity; Age differences; Education; Income; Correlation matrix; Multiple regression

Abstract: Although fear of crime has been found to be consistently associated with a number of sociodemographic factors, such as age, gender, and race, the empirical findings on its relationship to residential location have been remarkably inconsistent. We use a sample of over 3,000 residents of North Carolina to explore the relationship between fear of crime and residential location. Our results indicate that rural residents have a significantly lower fear of crime than their urban counterparts when known correlates are controlled. Implications for future research are discussed.

29 NAL Call No: 281.28 R88
Fear of crime in rapidly changing rural communities: a longitudinal analysis.
Krannich, R.S.; Berry, E.H.; Greider, T.
Bozeman, Mont. : Rural Sociological Society.
Rural sociology v. 54 (2): p. 195-212; 1989. Includes references.

Language: English

Descriptors: Western states of U.S.A.; Rural communities; Crime; Population dynamics; Economic growth; Structural change; Time series; Longitudinal studies

Abstract: This study addresses fear of crime in Western communities with rapidly changing populations. Most prior research has reported a relatively low fear of crime in rural communities. However, some recent analyses have indicated unusaally high fear in small towns experiencing rapid population growth and economic changes due to energy developments. Heightened fear of crime has been observed even where there has been no apparent increase in criminal victimization experiences. This paper examines four communities at three points in time to assess the causes of shifting fear of crime. Results indicate that measures of contextual change, individual social integration, and criminal victimization influence fear of crime more than do individual compositional variables.

Abstract: Using 3,130 U.S. counties or county equivalents, this paper provides a test of the impact of rural population on the violent crime of homicide, while controlling for the effects of other correlates. The results indicate that the traditional bond of group cohesion assumed to be associated with the rural environment and its residents continues to have an inhibiting effect on homicide for counties in the United States.

Abstract: Extract: There are two major sources of data which can be drawn upon for purposes of delineating the types of crimes which are presently occurring in rural areas. The first source utilizes information which is gathered directly from the victims of the crime. The research technique is called victim survey research. The second source of data derives from records maintained by law enforcement agencies. The discussion to follow will utilize both in an attempt not only to illuminate the extent of the crime problem but as well to denote the differences and discrepencies which may arise depending on which source of data is utilized for purposes of interpretation, explanation and/or policy making.

Abstract: Extract: Individuals projecting local government expenditures in small cities typically assume that average costs can be represented by a single, smooth, continous function. This paper discusses why assuming piece-wise continuity may be more realistic. Segmented regression is then used to test for discontinuities in local per capita expenditures for police protection in Minnesota, North Dakota, and Wisconsin. Three distinct segments were found for expenditures in North Dakota and Wisconsin; two for Minnesota. Minnesota and Wisconsin results improved further when cities with declining and nondeclining populations were treated separately.

The Journal of early adolescence v. 4 (1): p. 41-46; 1984. Includes references.

Language: English

Descriptors: Adolescent development; Self concept; Rural youth; Delinquent behavior; Peer influences; Family environment

Abstract: Using a sample of rural early adolescents the present study found delinquent adolescents to have a lower self-concept than their nondelinquent counterparts, especially in the areas of body image, moral and ethical self, and family self-concept. These delinquents showed significant signs of maladjustment on the Tennessee Self-Concept Scale but accepted their negative self-image. Supplementary questions indicated that the delinquent group felt emotionally distant from their families, overreliant on their peers, and saw little hope for their future.
